

Vacancy Code ESMNMS-SC

Job title:	NMS/OSS Senior Consultant
Division/Department:	Network Management
Reporting to:	Practice Manager - Neil Harvey
Location:	Slough/Customer Site

Key Purpose

The requirement is for an experienced NMS/OSS consultant who has worked on the design and deployment of the management of large complex networks for large Enterprise and Service Providers.

Key Responsibilities

- Provision of high level consultancy in design and implementation of NMS/OSS solutions

Person Specification

- Strong communications skills (written, verbal and presentation)
- Flexible and have no issue with working away from home within and outside the UK
- 5-10 years experience in the management of large Enterprise and Service Provider networks
- Strong NMS/OSS architecture knowledge (ITIL, FCAPS, NGOSS)
- Proven design and implementation skills with key vendor NMS solutions (HP, IBM, CA)
- Strong network performance and capacity management knowledge
- Ability to be proactive and work unmanaged on customer sites
- Strong pre-sales skills
- Cisco networking knowledge including management of overlay services (MPLS, VOIP, Multicast)
- Basic project management skills
- Security cleared if possible
